

# SEISMOLOGICAL RESEARCH LETTERS

Volume 71, Number 4, July/August 2000

**Editor in Chief**

JOHN E. EBEL

**Editorial Assistant**

MARJORIE SHANE

**Eastern Section Editor**

MARTIN C. CHAPMAN

**Eastern Section Associate Editor**

MATTHEW SIBOL

**Copyeditor**

JANICE SELLERS

**Design**

TEUSCHEL DESIGN SERVICES

PALO ALTO, CA

**Typesetting**

RDD CONSULTANTS, INC.

LOUISVILLE, CO

**SSA Headquarters:**

**Executive Director**

SUSAN B. NEWMAN

**Assistant Director**

KATHLEEN A. ROWE

**Publications Coordinator**

JANICE SELLERS

**Subscriptions to *Seismological Research Letters (SRL)*:** The subscription rate for new institutions and other nonmembers in North America is \$98 (\$108 outside North America). Members of the Seismological Society of America receive *SRL* as a perquisite of membership. Individuals may apply for membership using the form printed near the back of this issue.

Single copies: Many back issues of *SRL* are available from SSA Headquarters.

*Seismological Research Letters* (ISSN 0895-0695) is published bimonthly in January, March, May, July, September, and November by the Seismological Society of America, Suite 201, Plaza Professional Building, El Cerrito, California 94530. Periodicals postage paid at El Cerrito, California and at additional mailing offices.

*Seismological Research Letters* was formerly published as *Earthquake Notes* (ISSN 0012-8287) from 1929–1986.

Postmaster: Send address changes to Seismological Research Letters (*SRL*), 201 Plaza Professional Building, El Cerrito, California 94530-4003.

Communications regarding publications, apart from submission of manuscripts, should be addressed to the Seismological Society of America, Suite 201, Plaza Professional Building, El Cerrito, California 94530-4003.

© 2000 by the Seismological Society of America. Printed in the U.S.A. by Edwards Brothers, Inc., Ann Arbor, Michigan.

## **Seismological Research Letters—Submissions**

*Seismological Research Letters (SRL)* is a journal containing articles and items of broad appeal on topics in seismology and earthquake engineering. Articles submitted to *SRL* should be informational in nature and should be of current interest to a cross-section of SSA membership. Articles expressing some particular view about seismology or seismological research will also be accepted. Articles that contain original research results should be submitted to the *Bulletin of the Seismological Society of America (BSSA)*. News and notes, special reports on particular earthquakes, seismic network summaries, information on computer hardware or software pertinent to seismology, seismological equipment information, book reviews, and letters to the editor are also solicited for publication in *SRL*.

Articles should not exceed 20 pages of double-spaced text (excluding figures) unless approved by the editor. Electronic submissions are encouraged via e-mail or computer disk in Macintosh or IBM formats. Please also send three copies of submitted articles. All submissions should be sent to the editor: John E. Ebel, Weston Observatory, Boston College, 381 Concord Rd., Weston, MA 02493. Telephone (617) 552-8300; fax (617) 552-8388; e-mail ebel@bc.edu.

## **Submissions to the Eastern Section of the SSA (ES-SSA) Section of *SRL***

The ES-SSA Section of *SRL* is devoted to the seismology of continental interiors. Articles pertaining to eastern North American earthquakes, intraplate seismotectonics, and earthquake engineering are particularly encouraged. Three copies of articles for this section should be sent to the ES-SSA editor: Martin C. Chapman, Dept. of Geological Sciences, Virginia Polytechnic & State Univ., 4044 Derring Hall, Blacksburg, VA 24061; telephone (540) 231-5036; fax (540) 231-3386; e-mail chapman@ruamoko.geol.vt.edu. Appropriate review articles and tutorials are also encouraged. Referees are sought on all ES-SSA papers exceeding four published pages in length. Page charges for articles in the ES-SSA Section are \$25 for each printed page. The editor may allow exceptions to the page charges under certain circumstances.

Please submit news and notes pertaining to the Eastern Section of SSA to ES-SSA Associate Editor Matthew Sibol, ENSCO, Inc., 445 Pineda Court, Melbourne, FL 32950. Telephone (407) 254-4122; fax (407) 254-3293.

## **On the Cover**

Two views of surface faulting related to the 17 August 1999 Izmit and the 12 November 1999 Düzce earthquakes in Turkey. The top photograph, taken seventeen days after the  $M_w$  7.4 Izmit, Turkey earthquake, shows surface cracking and minor vertical displacements. This faulting is located along the south side of the ~3-km-wide Eften Lake releasing step-over, near the eastern termination of the surface faulting caused by the 17 August 1999 event. The bottom photograph is a nearly identical view taken ten days after the  $M_w$  7.2 Düzce earthquake. This earthquake reruptured the easternmost extent of the August rupture, producing a combination of normal and right-lateral slip for about 3 km to the east, before slip became predominately right-lateral for a total of ~40 km of surface rupture. *Photographs by Timothy Dawson.*

Authorization to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Seismological Society of America provided that the appropriate fee of \$3 per copy is paid directly to Copyright Clearance Center, ISSN 0895-0695, 222 Rosewood Drive, Danvers, MA 01923, USA; telephone (978) 750-8400.
